### **KENTUCKY BLUE GAS CO. LAUNCHES MODERN GAS PROCESSING FACILITY** *Local Energy Company Adds Second Shift Crew in Preparation for 24-Hour Operation*

**BOWLING GREEN, KY., July 1, 2009** – Kentucky Blue Gas Co., a producer and processor of natural gas in Bowling Green, Ky., announced it began processing and supplying gas this week to a local natural gas utility company. The processing and sale of natural gas marks the completion of the plant's comprehensive testing phase.

The gas processing facility, located at 425 Power St., consists of various components used for the removal of impurities including hydrogen sulfide, nitrogen, ethane and propane from natural gas. Gas is piped in from natural gas wells, processed for consumer use and sold to a local natural gas utility company for consumption in the Bowling Green area. The facility was designed with a capacity of processing 3,000 MCFs of natural gas per day.

"Completing the testing phase of our gas processing facility in the first quarter of 2009 was an important milestone for Kentucky Blue Gas Co.," said Roopesh Aggarwal, a senior official with the natural gas firm. "In anticipation of expanding operations at the facility, we have added a second shift crew to enable 24-hour operations."

"I congratulate Kentucky Blue Gas Co. for attaining this milestone," said Bowling Green Mayor Elaine Walker. "The independent natural gas company is an important member of our community as it provides quality jobs, contributes to our local economy and supports Bowling Green non-profit organizations. Its planned expansion in 2009 is significant."

Kentucky Blue Gas Co. is currently seeking in north Warren County leasing opportunities for natural gas and oil production as well as gas purchase contracts with other operators with isolated gas wells that could be effectively served by its pipeline. With a fleet of company drilling and service rigs and an experienced drilling team, Kentucky Blue Gas Co. operates in an environmentally responsible manner for the exploration, development and production of natural resources on private lands.

Kentucky Blue Gas Co.'s methodical approach to identifying possible natural gas and oil reserves, utilization of modern technology and integrity-based business practices allow land owners to benefit from the production of natural resources.

### **ABOUT KENTUCKY BLUE GAS CO.**

Kentucky Blue Gas Co. is an independent energy company with more than 380 leases spanning approximately 62,000 acres in Butler, Ohio and Warren counties in the Commonwealth of Kentucky. The company executes its strategy with purpose and expertise in tapping Kentucky's valuable yet underdeveloped natural resources. Operating from its field headquarters in Bowling Green, Kentucky Blue Gas Co. is committed to a culture of compliance with respect to all applicable federal, state and local laws and regulations including environmental, health and safety. In addition, Kentucky Blue Gas Co. is committed to developing relationships and working in partnership with the local community.
